Autumn Blend

While Halloween and Thanksgiving are almost a month apart, between handing out candy and planning who will sit closest to the turkey, time can fly. Consumers who don't feel like going crazy over a short-lived holiday like Halloween and turning around to decorate for Thanksgiving can benefit from accessories that work for both. Pumpkins with vibrant oranges and neutral tones can reflect the season well, while signage that takes the work out of changing décor can be an easy sell. —*T.L.*
