A Pizza Mind

A timeless dish in its own category, the definition of the perfect pizza is disputed across the nation, from a slice in New York to a deep dish pie in Chicago. No matter how you slice it, pizza is a meal for the people, regardless of whether they like it topped with anchovies, veggies or pineapple. Consumers can be inspired to craft their own creations with an in-store pizza-making night, sampling the latest baking stones, fun pizza cutters and more. —*T.L.*
